1. Introduction and methodology	1
1.1 The importance of textiles	1
1.2 Definition of textiles	3
1.3 Objectives of the study	4
1.4 Scope and coverage	4
1.5 Sources of facts and figures	6
1.6 Major statistical methods and formulae	10
Foot notes to Chapter 1	14
2. Supply of textiles from British rule to the end of 1950's	15
2.1 The supply under the British rule	15
2.1.1 The period upto the World War II	15
2.1.2 Impact of the World War II	19
2.2 Aftermath of the war	24
2.3 Protection under I.P.A.	27
2.4 Supply during 1950's	27
2.4.1 Growth in domestic production	30
2.4.1.1 The mill output	34
2.4.1.2 Powerloom supply	35
Foot notes to Chapter 2	37
Appendix	42
3. Supply of textiles between 1960 and 1975	48
3.1 The drift towards a panic	48
3.2 Aftermath of the textile panic	53
3.3 Self-sufficiency programme	56
3.4 Domestic supply of textile after 1970	61
Foot notes to Chapter 3	63
4. The Demand Model	71
4.1 Demand function	71
4.2 Definition of variables	72
4.2.1 Prices of textiles	72
4.2.2 Alternative prices	74
4.2.3 G.C.P.	74
4.2.4 Population	76
4.2.5 Demonstration effect	76
4.2.6 Speculation for textiles	77
4.3 The modified demand function	78
4.3.1 The assumptions	78
4.3.2 The time services	79
4.4 Regression analysis	80

4.4.1	Regression relationship for 1951-75	80
4.4.2	Auto - correlation	82
4.4.3	Break up of the time period	82
4.4.3.1	Regression relationships for 1956-75	83
4.4.3.2	Regression relationships for 1951-60	84
4.4.4	Structural differences	86
4.4.5	Specification errors	86
	Appendix	87
5.	Forecasts	91
5.1	Forecast methods	91
5.2	Forecasts with extrapolation of trends	91
5.3	Pre-requisite for projections based on regression analysis	93
5.4	Projection procedures for independent variables	94
5.5	Forecasts based on regression analysis	96
5.6	The magnitude of the satisfied demand	102
6.	Conclusions	105
6.1	Contributions	105
6.2	Early promotional activities	106
6.3	General features during the 50's	107
6.4	Protection Era	109
6.5	Outlook of the textile supply	113
7.	Bibliography	118
8.	Acknowledgements	120
