Abstract

The objective of this research study is to find out how to allocate the media budget to gain optimum exposure. This analysis, is based mainly on the viewing habits of people and rate cards of each Television station in Sri Lanka. The analytical technique employed in this study is an integer program, which is special case of backpack loading problem.

A Computer system was developed to obtain the best media schedule using Visual Basic 6. This system is very user-friendly and needs a machine with high processing speed.

Contents	vi
List of tables	ix
List of figure	x
Acknowledgement	xi
Abstract	xii

Chapter 01: INTRODUCTION

1.1	Introduction	1
1.2	Key words	2
1.3	Background	3
1.4	Literature survey	7
1.5	Scope of the study	7
1.6	Objective of study	8

Chapter 02: METHODOLOGY AND THEORY

2.1	Methodology of analysis	9
2.2	Theory behind the analysis	
2.2.1	Integer Programming	10
2.2.2	Branch and bound technique	11

Chapter 03: SURVEY OF MEDIA HABITS

3.1	Objective of the survey	13
3.2	Population sampling frame	13
3.3	Sampling distribution	14
3.4	Estimated size of sampling frame	15
3.5	Sampling design	17
3.6	Concepts and definition	18
3.7	Data collection and process	
	3.7.1 Field work	19
	3.7.2 Process data	19
3.8	Questionnaire design	20

Chapter 04: MATHEMATICAL MODEL

4.1	Model Formulation	28
4.2	Simplification of the model	29
4.3	Algorithm	29
4.4	Flowchart	32

Chapter 05: COMPUTER MODEL 33

Chapter 06: DISCUSSION AND CONCLUSION

6.1	Introduction	48
6.2	Conclusion	49
6.3	General Discussion	49
6.4	Limitation of the study	50
6.5	Suggestions and further analysis	51
