

**An Empirical Study of Challenges Faced by Nenasala Centers in
Rurban Areas of Sri Lanka**

By

K.L.S.L. Abeywickrama

GS/M.Sc/MGT/341 7/08

**Thesis submitted to the University of Sri Jayewardenepura for
the award of the Degree of Master of Science in Management**

DECLARATION

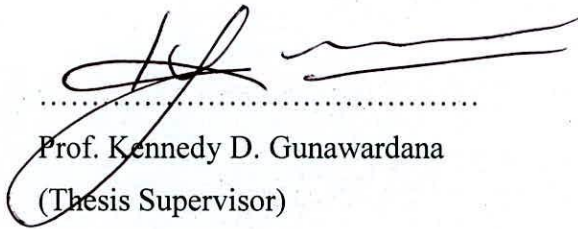

The work described in this thesis was carried out by me under the supervision of Professor Kennedy D Gunawardana and a report on this has not been submitted in whole or in part to any university or any other institution for another Degree/Diploma.

.....
K.L.S.L. Abeywickrama

CERTIFICATION

I certify that the above statement made by the candidate is true and that thesis is suitable for submission to the University for the purpose of evaluation.

.....
Prof. Kennedy D. Gunawardana
(Thesis Supervisor)

2011/11/20
.....
Date

Prof. Dr. Kennedy D. Gunawardana
B.Sc(SJP), MBA(Col), PHD(Abac), CMA(Au)
Prof of Accounting, Department of Accounting
University of Sri Jayewardenepura,
Nugegoda, Sri Lanka.

TABLE OF CONTENTS

List of Figures.....	v
List of Tables.....	vi
Acknowledgement.....	ix
Abstract.....	x
1. CHAPTER 1 INTRODUCTION.....	1
1.1. Background to the Study.....	1
1.1.1. Rurban Settlements.....	2
1.2. Problem Statement.....	4
1.3. Research Objectives.....	6
1.4. Significance of the study.....	7
1.5. Limitations.....	8
1.6. Organization of the Chapters.....	9
2. CHAPTER 02 LITERATURE REVIEW.....	11
2.1. Introduction.....	11
2.2. Rural Transformation and Rurban Zones.....	11
2.3. Information and communities.....	13
2.3.1. Community Information.....	14
2.3.2. Specific information needs of rural people.....	15
2.3.3. Human Information Behavior.....	15

2.3.4.	Factors affecting Community information seeking	16
2.3.5.	Information Dissemination and Socio Economic Development	19
2.4.	Digital Divide	20
2.4.1.	Current Trends in the digital divide	23
2.4.2.	Digital Divide in Sri Lanka	24
2.5.	Telecentre approach to bridge the Digital Divide.	27
2.5.1.	Types of Telecentres	30
2.5.2.	Telecentre contributions in empowering people	32
2.5.3.	Issues faced by telecentres in General	33
2.5.4.	Telecentre initiatives in Indian Subcontinent	37
2.5.5.	Telecentre Trends	43
2.5.6.	Telecentres for Rurban Empowerment	43
2.5.7.	Summery	47
3.	CHAPTER 03 SRI LANKAN INITIATIVES IN ICT FOR DEVELOPMENT	51
3.1.	Community based ICT interventions before e-Sri Lanka Program	53
3.1.1.	Kothmale Community Radio (KCR) and Kothmale Community Radio Internet Project (KCRIP)	53
3.1.2.	e-TUKTUK (www.etuktuk.net)	57
3.1.3.	Govi Gnana Systems (GGS)	58
3.1.4.	Vidatha Centers	61
3.1.5.	Mahavillachchiya e-Village	62
3.1.6.	Sarvodaya – Telecentre Project	65

3.2.	E Sri Lanka Initiative	66
3.3.	Summary	74
4.	CHAPTER 04 METHODOLOGY.....	75
4.1.	Methodology	75
4.2.	Population and Sample.....	76
4.2.1.	Population.....	77
4.2.2.	Sample	78
4.3.	Conceptual Framework	80
5.	CHAPTER 05 DATA ANALYSIS AND DISCUSSION.....	82
5.1.	Introduction	82
5.2.	Descriptive Statistics	82
5.2.1.	Reliability analysis.....	82
5.2.2.	Presentation, analysis and discussion of demographic data	84
5.2.3.	Presentation, analysis and discussion of data relating to Educational Levels.....	87
5.2.4.	Presentation, analysis and discussion of skill level in ICT and English	92
5.2.5.	Possession or availability of ICT related equipments in the Houses....	96
5.2.6.	Nenasala usage Information	98
5.2.7.	Presentation, analysis and discussion of data relating to Occupation and Income.....	100
5.2.8.	Challenges and Barriers in effective implementation of Nenasala.....	102
5.2.9.	Service requirements / Information requirements of rurban dwellers	104

5.3.	Inferences Testing	110
5.3.1.	Hypotheses.....	110
5.3.2.	Summary of the hypothesis testing.....	139
5.4.	Discussion of the Objectives	142
5.4.1.	Objective 01: To find out the information requirements and new service needs of the rurban dwellers	142
5.4.2.	Objective 02: To find out the existing challenges and barriers in implementing and developing Nenasala centers in rurban areas	143
5.4.3.	Objective 03: To make suggestions to improve the effectiveness of the Nenasala centre in Rurban area	143
6.	CHAPTER 06 CONCLUSIONS AND RECOMMENDATIONS	145
6.1.	Introduction	145
6.2.	Conclusions	145
6.3.	Recommendations	146
6.3.1.	Short term recommendations.....	147
6.3.2.	Long term recommendations	148
6.4.	Suggestions for further research.....	150

ACKNOWLEDGEMENT

This thesis would not have been possible if I did not received the extended support given by my supervisor. I am grateful to my supervisor, Professor Kennedy Gunawardana, Senior lecturer, Department of Accounting, university of Sri Jayewardenepura for his invaluable guidance and encouragement.

A special thanks goes to Dr. R.M.K. Rathnayake, Senior Lecturer of Department of Geography of University of Sri Jayewardenepura and to Mrs. Indu Weerasooriya, director of the urban development authority for their invaluable support in tackling the rurban related issues.

I should thank to Dr. P.D. Nimal, coordinator, MSc in Management program for the support given to me in conducting this study. Further I extend my special thanks to Mr. V.G.C Thushara and to Mr. Chesmi Kumbalathara of Information Technology Resource Centre and other colleagues for being with me generously stretching out their helping hands.

I appreciate the support given to me by all the operators of the Nenasala and respondents who filled the questionnaires carefully by spending their valuable time.

I must never forget the great assistance and encouragement given to me by my parents and my wife. I should express my love to my little daughter “Dinithi” since I did not have much time to cuddle you. Last but not least I would like to thank everybody who helped me to achieve this goal.

K.L.S.L Abeywickrama

An Empirical Study of Challenges Faced by Nenasala Centers in Rurban Areas of Sri Lanka

By : K.L.S.L. Abeywickrama

ABSTRACT

The world is transforming from one state to another so quickly. Isolated rural areas in the world now being connected through Information communication technologies and this leads to the transformation of the agriculture based economies of the rural areas.

Rurbanization is a process of rural transformation. Even though the idea of rurban communities was first introduced in the beginning of 20yth century by Charles Josiah Galpin (1864-1947), it is not yet caught the much attention of the urban planners in developing countries. Rurbanization is a prominent development process commonly witnessed in developing countries. This transformation has rapidly increased after the 1980s.

There is a growing trend of forming rurban settlements in Sri Lanka due to the unavoidable process of rural transformation. This situation is common in Colombo, Gampaha and Kalutara districts. They have very limited access to information due to number of reasons. Information Communication Technology (ICT) can bring about important changes to the standards of living of the rurban population and needs to identify their information requirements. Information requirements of rurban population show different characteristics than those of rural and urban population.

This study was mainly conducted to identify the challenges and barriers in implementing telecentre concept in rural areas. Also an attempt was made to identify the information and service requirements of the dwellers in rural areas. A questionnaire was developed and data were collected from telecentre users and potential users in the Colombo and Gampaha districts. Findings suggested that commonly identified barriers for rural areas were not valid in the same level for the rural areas. Three factors among the others were identified as barriers in effective implementation of barriers in rural areas.

CHAPTER 1

INTRODUCTION

1.1. Background to the Study

In today's global economy, countries at all income levels face a growing imperative to leverage Information and communication Technologies (ICT) in support of their economic development and competitiveness. Developing as well as developed countries especially aspire to exploit the ICT to improve the dissemination of information among the citizens, to improve the productivity of the public services and finally to improve the standards of the living in the country.

ICT has now become the general purpose technology of our era, much like the technologies responsible for the industrial revolution. (Hanna 2007). ICTs play a critical part of all kinds of economic transactions, development processes and learning activities. Most of the governments adopt e-strategies in various aspects. These e-Strategies must be integrated across all the sectors. If deployed appropriately, ICTs can effect economic, social and political empowerment (Nikam et.al 2004).

Use of ICT to facilitate community improvement is a popular strategy or a tool used by the countries at all levels. How to energize and facilitate community improvement in third world countries through effective information dissemination has, more than ever before, attracted the attention of local and international bodies and institutions (Uhegbu 2001).
